Participant Center and Fundraising on Facebook

You can raise money for this year's event through Facebook! By adding the *boundless*FUNDRAISING™ application to your Facebook page, you can extend your fundraising efforts to your networks of friends on Facebook.

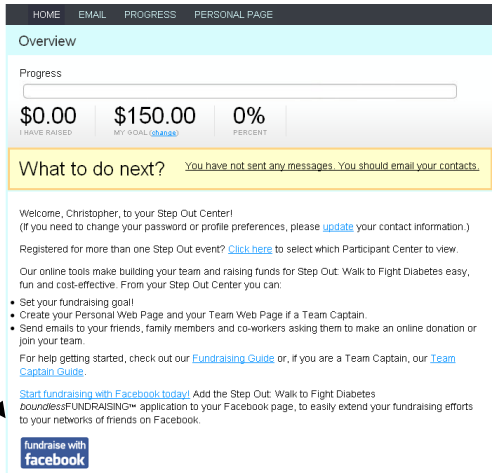
Here's how it works:

Once you've added the *boundless*FUNDRAISING™ application to your Facebook, you'll have your **fundraising progress** on your Facebook page where you and **your friends can check your progress and donate to your efforts**. Your friends can click a link to make a donation towards your fundraising efforts. Your friends can also click a link to join your team. It's that easy!

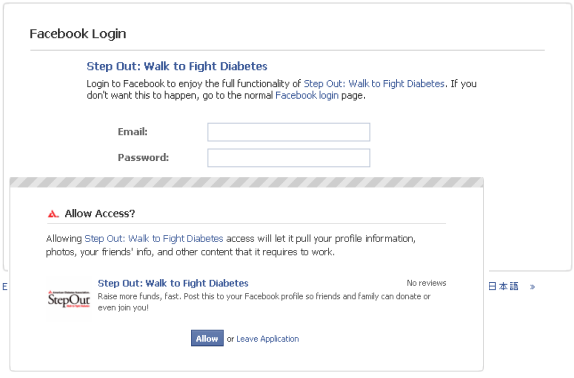
You can update your status on your profile frequently to let your network of friends know about your participation and fundraising progress, including thank you notes to donors, information about your training, and invitations to join your team.

As your fundraising total increases, we'll send stream stories to your Facebook page with updates on your fundraising progress. You will also receive notifications via Facebook as the walk gets closer, with tips on how to make the most out of your fundraising efforts as well as any last-minute details regarding the event.

Step 1: When you log in to your Participant Center, you will see the "Fundraise with Facebook" button on the lower left. Click it to begin the process.



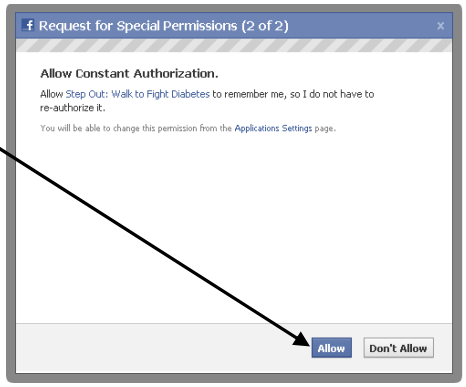
Step 2: This will bring you to Facebook and prompt you to login.



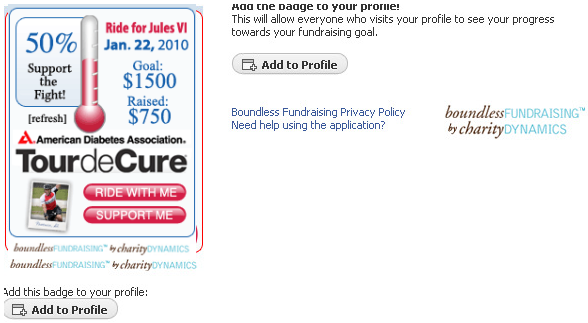
Step 3: You will be asked if you wish to allow this application to access your profile. Click "Allow".

Step 4: After you log in, you will see two screens which will prompt you to allow this application to update itself based on your personal fundraising page. This allows the application to keep the thermometer and information correct on Facebook.

Click "Allow Publishing" in the first window, and then "Allow" in the second.



Step 5: You will now see a preview of how the application will appear on your profile. Click the "Add to Profile" button to select how you would like the application to be positioned on your profile.



Step 6: Choose between publishing to your Wall and Info Tab or your Box Tab. You will see a preview. If you are happy with the placement, click "Keep" if not click "No Thanks" and add it to a different Tab.
