The Burden of Diabetes in Idaho

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 30 million Americans have diabetes and face its devastating consequences. What’s true nationwide is also true in Idaho.

Idaho’s diabetes epidemic:
Approximately 135,000 people in Idaho, or 10.3% of the adult population, have diabetes.

- Of these, an estimated 36,000 have diabetes but don’t know it, greatly increasing their health risk.
- In addition, 397,000 people in Idaho, 34.9% of the adult population, have prediabetes with blood glucose levels higher than normal but not yet high enough to be diagnosed as diabetes.
- Every year an estimated 7,000 people in Idaho are diagnosed with diabetes.

Diabetes is expensive:
People with diabetes have medical expenses approximately 2.3 times higher than those who do not have diabetes.

- Total direct medical expenses for diagnosed diabetes in Idaho were estimated at $1 billion in 2017.
- In addition, another $310 million was spent on indirect costs from lost productivity due to diabetes.

Improving lives, preventing diabetes and finding a cure:
The Division of Diabetes Translation at the CDC provided $862,000 in diabetes prevention and educational grants in Idaho in 2017.

- Diabetes Incidence: 2015 state diabetes incidence rates, cdc.gov/diabetes/data

Diagnosed diabetes costs an estimated $1.3 billion in Idaho each year.
The serious complications include heart disease, stroke, amputation, end-stage kidney disease, blindness – and death.
